

Activity 01:

1. In this assignment you will install the programs that we need to program.
2. When you have everything installed, and are connected with GitHub you should; Take a screenshot of your python version, git version and Pycharm Community and Pycharm EDU, past it in a document and submit it under TAP 1 on GitHub as a PDF.

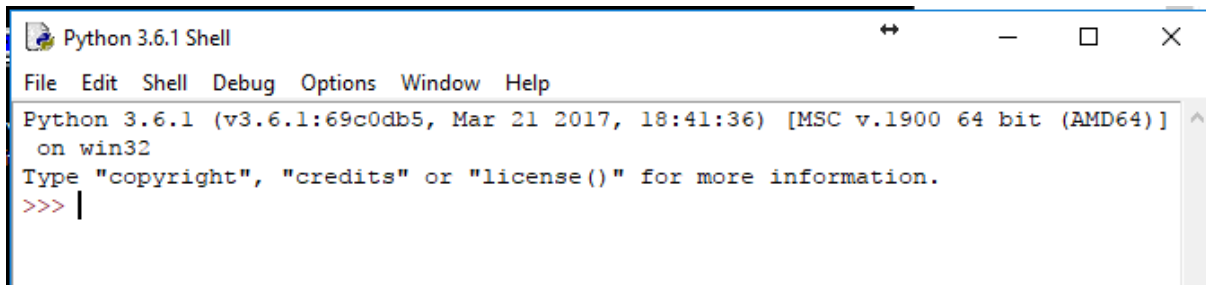

Submit the results to the TAP repository on GitHub, inside a new folder.

Here is my *GitHub* account with access to NoroffNIS. I will upload this document to the TAP 1 folder visible in the screenshot.

```
C:\Users\lykketrollet>python
Python 3.6.1 (v3.6.1:69c0db5, Mar 21 2017, 18:41:36) [MSC v.1900 64 bit (AMD64)] on win32
Type "help", "copyright", "credits" or "license()" for more information.
>>> _
```

Here I have installed *Python 3.6.1* and are now ready to start programming.
